

DELIVERY TIMES & CONDITIONS

Our portfolio is divided into three categories; routine, special and customised analysis

ROUTINE ANALYSIS

Many standard analysis of soil and water are carried out on daily basis. The standard delivery time of these analyses is 5 working days after receipt of samples and order.

For several analyses, such as leaching, column tests and biochemical oxygen demand, different delivery times may apply. The majority of these standard analyses can also be requested with shorter delivery times. This type of analysis is marked with 'routine analyses' in the header of our pricelist.

SPECIAL ANALYSIS

This type of analysis is carried out less frequently. The standard delivery time for these analyses is 7 working days.

This type of analysis is marked with 'special analyses' in the header of our price list.

CUSTOMISED ANALYSIS

This type of analysis will be developed upon request. Performance characteristics and prices will be agreed separately.

TERATTEST®

The standard delivery time for TerrAttesT® is 5 working days.
